

BACHELOR OF SCIENCE IN PSYCHOLOGY PROGRAM

Psychology is known as the “scientific study of behaviour and mental processes”. In line with the nature of psychology, the BS Psychology program of Xavier University aims to provide students with the necessary knowledge, skills and attitude for jobs that may involve interpersonal relations, ethics and research, mental health and psychological welfare and development and functioning of the person, the group, the community and organizations or institutions. The program embodies the university’s core values of competence, conscience and commitment through its courses and through encouraging students to become actively involved in working for the marginalized community. In addition, the program prepares students for further study in fields such as law, business and management and medicine.
